

Purpose: This SOP serves as a guide for the purpose of the Genetic Technology committee and its yearly activities.

Scope: Genetic Tech committee work

References: Committee Chair Handbook 6-21-23

Procedure:

Genetic Technology

Purpose: To be involved in and keep the Society aware of all aspects of genetic technology as it relates to seed testing.

Committee structure: Two co-chairs and four working groups with a chairperson.

Duties as outlined in the Constitution and By-laws:

- Review genetic testing methods used for testing seeds.
- Work with the RGT board of examiners and working groups to improve awareness of new trends and provide expertise in genetic technology as it relates to seed testing.

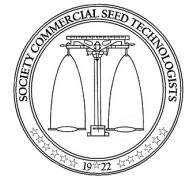

Other duties:

- Recommendations for the RGT Board of Examiners will be forwarded from the working groups of this committee to the examination committee chair.
- Identify crop kinds needed for practical exams and work to provide the samples.
- Create an area for members involved with genetic testing to become involved with SCST
- Create working groups within the committee to discuss changes in technology and current issues
- Identify training needs and assist SCST in developing useful workshops for our members.

Meetings:

- The working groups may hold open meetings at the annual meeting.
- The committee will meet by conference call as needed.
