

## Volume 1. Principles and Procedures

The noxious weed seed and bulk examinations working weights shall be 10 times the purity working weight (the weight of seed mat or seed tape containing approximately 25,000 seed units) or a maximum of 1,000 grams for kinds in Table 2A for which the working sample weight of raw seed is 500 grams.

- 2.4** The minimum working sample weights for purity analysis, noxious weed seed examination and bulk examination are given in Table 2A.
